Environmental Management

Supporting governments, development partners, investors and organizations to build a resilient, low-carbon and sustainable future across Africa.

PROFESSIONAL PROFILE

A DECADE OF EXCELLENCE IN CLIMATE CHANGE, SUSTAINABILITY & ENVIRONMENTAL MANAGEMENT

John Kiwewesi is a Climate Change, Sustainability and Environmental Management Specialist with multidisciplinary experience supporting governments, development partners, NGOs, investors and private sector organizations across Africa.

His expertise spans climate change adaptation and mitigation, ESG and sustainability advisory, carbon markets, climate finance, forestry investments, biodiversity conservation, environmental compliance, environmental project management and natural resource governance.

Drawing on experience gained through international organizations, donor-funded projects, consulting assignments and private sector engagements, he supports institutions in developing practical and sustainable solutions to environmental and climate-related challenges.

His unique combination of environmental expertise, governance, risk management, compliance and donor fund oversight enables him to bridge the gap between environmental sustainability and organizational performance.

Having supported assignments across Uganda, Kenya, Tanzania, South Sudan, Burundi, the Democratic Republic of Congo and beyond, John brings both regional insight and practical implementation experience to every engagement.

KEY AREAS OF EXPERTISE

- | Climate Change Adaptation & Mitigation
- | ESG & Sustainability Advisory
- | Carbon Markets & Nature-Based Solutions
- | Climate Finance & Green Investments
- | Forestry Investment Advisory
- | Conservation & Biodiversity Management
- | Environmental Compliance & ESIA's
- | Environmental Project & Donor Fund Management
- | Natural Resource Governance
- | Sustainable Development Planning

ACADEMIC BACKGROUND

- Bachelor of Science in Environmental Engineering and Forestry Conservation
Makerere University, Uganda
- Certificate in Environmental and Social Impact Assessment (ESIA)
Makerere University, Uganda

PROFESSIONAL CERTIFICATIONS

- Climate Change Mitigation in Developing Countries
Coursera
- Sustainability and Climate Change
Udemy
- Climate Risk, Valuation, and Investing Certificate
CFA Institute
- Certified Climate Change Professional (CC-P)
Association of Climate Change Officers

“ Sustainable development is achieved when environmental stewardship, economic growth and community resilience work together.

ADDRESSING AFRICA'S CLIMATE, FORESTRY & SUSTAINABILITY CHALLENGES

Building Resilient Communities, Sustainable Investments and Environmental Stewardship

Africa faces growing environmental challenges driven by climate change, deforestation, biodiversity loss, ecosystem degradation, land-use pressures and increasing sustainability expectations from investors, regulators and development partners.

Communities, governments and organizations are increasingly required to strengthen environmental governance, improve climate resilience and implement sustainable solutions that balance economic growth with environmental protection.

At the same time, growing global demand for ESG compliance, carbon credits, climate finance and sustainable investments has created significant opportunities for organizations prepared to embrace the green transition.

Through a multidisciplinary approach combining environmental science, sustainability, climate finance and project management, John Kiwewesi supports organizations in designing practical and measurable solutions that generate environmental, social and economic value.

SUPPORTING ORGANIZATIONS TO:

CLIMATE CHANGE & RESILIENCE

Develop adaptation and mitigation strategies that strengthen resilience and reduce climate-related risks.

SUSTAINABLE FORESTRY

Promote responsible forest management, restoration and sustainable forestry investments.

ESG & SUSTAINABILITY

Strengthen sustainability performance and align operations with international ESG expectations.

CONSERVATION & BIODIVERSITY

Protect ecosystems, biodiversity and natural resources through practical conservation solutions.

CLIMATE FINANCE

Access climate finance opportunities and develop bankable environmental projects.

ENVIRONMENTAL GOVERNANCE

Strengthen environmental compliance, policy implementation and sustainability reporting.

DONOR FUNDED PROJECTS

Design, implement and manage environmental and climate-related projects funded by development partners.

NATURE-BASED SOLUTIONS

Develop ecosystem restoration and carbon-related initiatives that deliver measurable impact.

“

The most successful environmental solutions are those that protect ecosystems while creating lasting economic and social value.

”

— JOHN KIWEWESI

JOHN

KIWEEWESI

SKILLS, EXPERTISE AND SERVICES

CLIMATE CHANGE, CARBON MARKETS & CLIMATE FINANCE

Transforming Climate Risks into Sustainable Opportunities

Climate change presents one of the greatest challenges and opportunities of our generation.

Organizations, governments and development partners increasingly require practical solutions that improve resilience, unlock climate finance and create measurable environmental impact.

John Kiwewesi supports institutions in developing climate-smart strategies, carbon initiatives and sustainable financing mechanisms that contribute to long-term environmental and economic sustainability.

KEY SERVICE AREAS

CLIMATE CHANGE ADVISORY

- Climate Risk Assessments
- Climate Vulnerability Analysis
- Adaptation Planning
- Mitigation Strategies
- Climate Resilience Programs

CARBON MARKETS & NATURE-BASED SOLUTIONS

- Carbon Project Identification
- Carbon Credit Project Development
- Nature-Based Solutions
- Forest Carbon Initiatives
- Carbon Market Readiness
- MRV Support

CLIMATE FINANCE

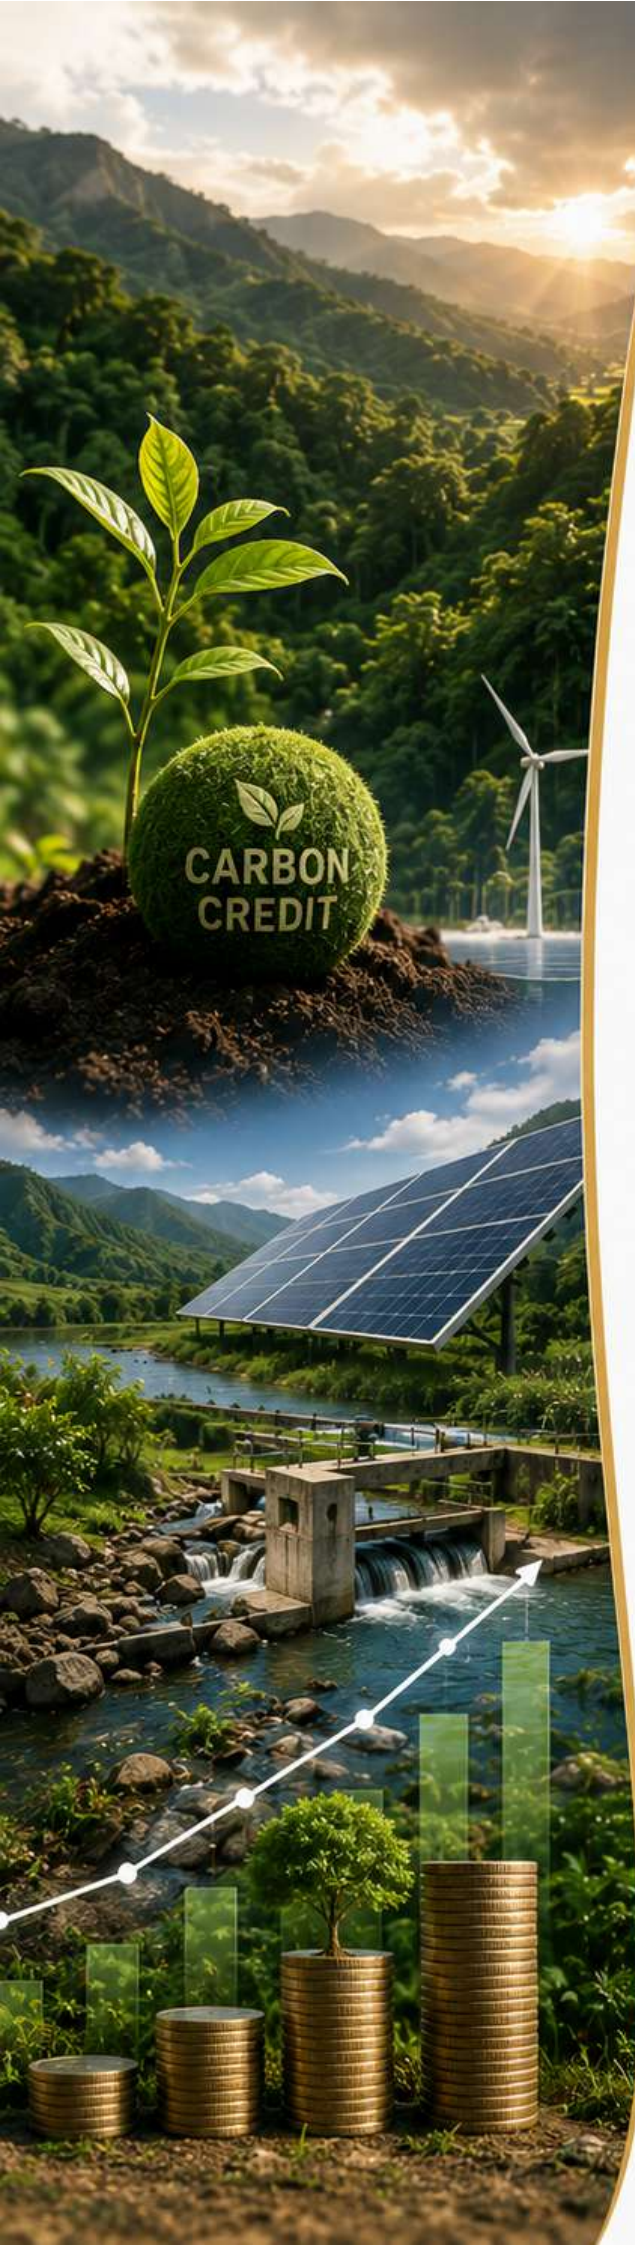

- Climate Finance Readiness
- Green Climate Fund (GCF) Support
- Climate Investment Advisory
- Green Financing Opportunities
- Bankable Project Development
- Donor Climate Project Support

CLIENT BENEFITS

- ✓ Increased Climate Resilience
- ✓ Access to Climate Finance Opportunities
- ✓ Improved Environmental Performance
- ✓ Enhanced Sustainability Credentials
- ✓ Long-Term Climate Adaptation Capacity

“ Climate action is not only an environmental responsibility; it is an investment in resilient economies, thriving communities and sustainable futures.

— JOHN KIWEWESI ”

ESG, SUSTAINABILITY & ENVIRONMENTAL GOVERNANCE

Building Responsible Organizations. Creating Lasting Impact.

Environmental, Social and Governance (ESG) principles are now central to organizational performance, investor decisions and stakeholder trust.

John Kiwewesi helps organizations integrate sustainability into their strategies, strengthen governance, enhance compliance and improve ESG performance in line with global standards and reporting frameworks.

CORE SERVICE AREAS

ESG STRATEGY & INTEGRATION

Develop ESG strategies aligned with business objectives.

SUSTAINABILITY REPORTING

Support GRI, SASB, TCFD and other reporting frameworks.

GOVERNANCE & COMPLIANCE

Strengthen policies, procedures and compliance systems.

STAKEHOLDER ENGAGEMENT

Enhance stakeholder relations and community engagement.

ENVIRONMENTAL MANAGEMENT

Improve resource efficiency and reduce environmental impacts.

ESG PILLARS & FOCUS AREAS

	ENVIRONMENTAL	<ul style="list-style-type: none"> Climate Change Management Resource Efficiency Waste & Pollution Management Biodiversity Conservation
	SOCIAL	<ul style="list-style-type: none"> Community Impact Labor & Human Rights Diversity & Inclusion Health & Safety
	GOVERNANCE	<ul style="list-style-type: none"> Corporate Governance Risk Management Ethics & Integrity Transparency & Disclosure

ESG VALUE CREATION IMPACT

“

Strong environmental governance and responsible business practices are the foundation of sustainable growth and long-term value.

— JOHN KIWEWESI

SUPPORTING GLOBAL FRAMEWORKS

Global Reporting Initiative
International sustainability reporting standards.

SASB Standards
Industry-specific sustainability accounting standards.

Task Force on Climate-related Financial Disclosures
Climate-related risk and opportunity disclosures.

UN Sustainable Development Goals
Aligning organizational contributions to global sustainability goals.

CLIENT BENEFITS

- ✓ Stronger ESG Performance & Ratings
- ✓ Improved Access to Capital & Investment
- ✓ Enhanced Reputation & Stakeholder Trust
- ✓ Better Risk Management & Compliance
- ✓ Operational Efficiency & Cost Savings
- ✓ Long-Term Sustainability & Resilience

03.

ENVIRONMENTAL & SOCIAL IMPACT ASSESSMENT (ESIA) & COMPLIANCE

Assess. Manage. Mitigate. Sustain.

Sound environmental and social assessment is the foundation of responsible development and regulatory compliance.

John Kiwewesi provides comprehensive ESIA services that help organizations identify risks, protect communities and ecosystems, and ensure compliance with national regulations and international safeguard standards.

From screening to impact evaluation and mitigation planning, I support projects through the entire ESIA process to ensure environmental responsibility and social accountability.

KEY SERVICE AREAS

ESIA SCREENING & SCOPING

Identify potential environmental and social impacts and determine assessment requirements.

BASELINE STUDIES & IMPACT ANALYSIS

Conduct environmental and social baseline studies and evaluate potential impacts.

MITIGATION & MANAGEMENT PLANS

Develop mitigation measures and Environmental & Social Management Plans (ESMPs).

STAKEHOLDER ENGAGEMENT

Design and implement stakeholder engagement and consultation processes.

COMPLIANCE & REGULATORY SUPPORT

Ensure compliance with national laws and international safeguard requirements.

MONITORING & REPORTING

Support environmental and social monitoring, reporting and disclosure.

ESIA PROCESS ROADMAP

1. SCREENING & SCOPING

2. BASELINE STUDIES

3. IMPACT ASSESSMENT

4. MITIGATION & ESMP PREPARATION

5. MONITORING, REPORTING & CLOSURE

TYPICAL PROJECTS SUPPORTED

Infrastructure & Construction Projects

Energy & Power Projects

Mining & Quarrying Projects

Industrial & Manufacturing Projects

Agriculture & Agro-processing Projects

Tourism & Hospitality Projects

Forestry & Land Use Projects

VALUE DELIVERED

Risk Identification & Mitigation

Regulatory Compliance

Community Protection & Engagement

Sustainable Project Development

“ Responsible development begins with understanding impacts and ensuring that progress today does not compromise the future. ”

— JOHN KIWEWESI

SUSTAINABLE FORESTRY & NATURAL RESOURCE MANAGEMENT

Protecting Forests. Restoring Landscapes. Creating Value.

Forests are vital to biodiversity, climate regulation and community livelihoods. Sustainable forest management ensures these resources deliver long-term environmental and economic benefits.

John Kiwewesi supports governments, communities and private sector clients in managing forest resources responsibly and unlocking value through sustainable forestry practices and green investments.

WHAT I DO

Sustainable Forest Management

Forest Restoration

Community Forestry

Forest Value Chains Development

Forest Carbon Initiatives

Policy & Compliance Support

THE IMPACT

01

Healthy Forests

Conservation and sustainable use of forest ecosystems.

02

Climate Action

Reduced emissions and increased carbon sequestration.

03

Community Benefits

Improved livelihoods and local empowerment.

04

Economic Value

Sustainable forest investments and green growth.

WHO I WORK WITH

Government Agencies

Development Partners

NGOs & Conservation Organizations

Private Sector & Investors

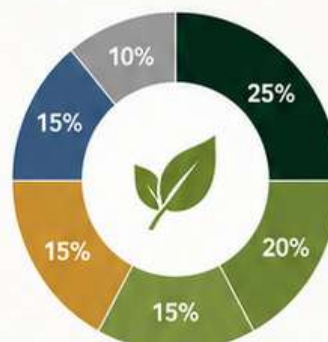

Community-Based Organizations

“
Sustainable forestry is not just about trees, it's about creating resilient ecosystems and prosperous communities for generations to come.

— JOHN KIWEWESI

FOCUS AREAS

- Forest Conservation
- Forest Restoration
- Community Forestry
- Forest Value Chains
- Forest Carbon Initiatives
- Policy & Governance

05.

RENEWABLE ENERGY & CLEAN ENERGY TRANSITION

POWERING SUSTAINABLE DEVELOPMENT. DRIVING A CLEANER FUTURE.

Access to affordable, reliable and sustainable energy is essential for inclusive growth and climate resilience.

John Kiwewesi provides advisory and technical support to governments, developers and investors to accelerate the transition to renewable energy and improve energy access across communities.

From strategy to project implementation, I help clients unlock the potential of clean energy solutions for lasting impact.

KEY SERVICE AREAS

ENERGY STRATEGY & POLICY ADVISORY

Develop energy policies, plans and roadmaps that promote clean energy adoption and energy security.

RENEWABLE ENERGY PROJECT DEVELOPMENT

Support feasibility studies, project design, structuring and preparation for investable renewable energy projects.

ENERGY ACCESS & OFF-GRID SOLUTIONS

Design and implement innovative solutions that expand clean energy access in underserved and rural communities.

CLEAN ENERGY FINANCE & INVESTMENT SUPPORT

Identify financing options, structure bankable projects and connect clients with investors and climate funds.

TECHNICAL DUE DILIGENCE & RISK ASSESSMENT

Assess technical, financial, environmental and social risks to support sound investment decisions.

IMPLEMENTATION SUPPORT & MONITORING

Provide oversight, monitoring and evaluation support to ensure performance, compliance and impact.

The transition to clean energy is not just about technology — it's about building resilient economies, protecting communities and securing a sustainable future for generations to come.

— JOHN KIWEWESI

ENERGY SOLUTIONS FOCUS

Solar Energy Solutions

Wind Energy Development

Small Hydro & Mini-Grid Systems

Biomass & Clean Cooking Solutions

Energy Storage & Smart Solutions

Energy Efficiency & Demand Management

CLIENT BENEFITS

- ✓ Accelerated Clean Energy Transition
- ✓ Improved Energy Access & Reliability
- ✓ Reduced Greenhouse Gas Emissions
- ✓ Attraction of Climate Finance & Investment
- ✓ Strengthened Energy Security
- ✓ Sustainable Economic Development

Clean energy is the engine of sustainable prosperity — creating jobs, powering communities and protecting our planet.

06.

ENVIRONMENTAL PROJECTS, DONOR FUND MANAGEMENT & CLIMATE FINANCE

TURNING ENVIRONMENTAL VISION INTO FUNDED, MEASURABLE IMPACT

PROJECT DESIGN

Environmental project development, concept notes, proposals, theory of change and implementation planning.

FUND MANAGEMENT

Budget oversight, donor compliance, financial accountability and project controls.

DONOR REPORTING

Progress reporting, environmental indicators, performance monitoring and donor communication.

PROJECT OVERSIGHT

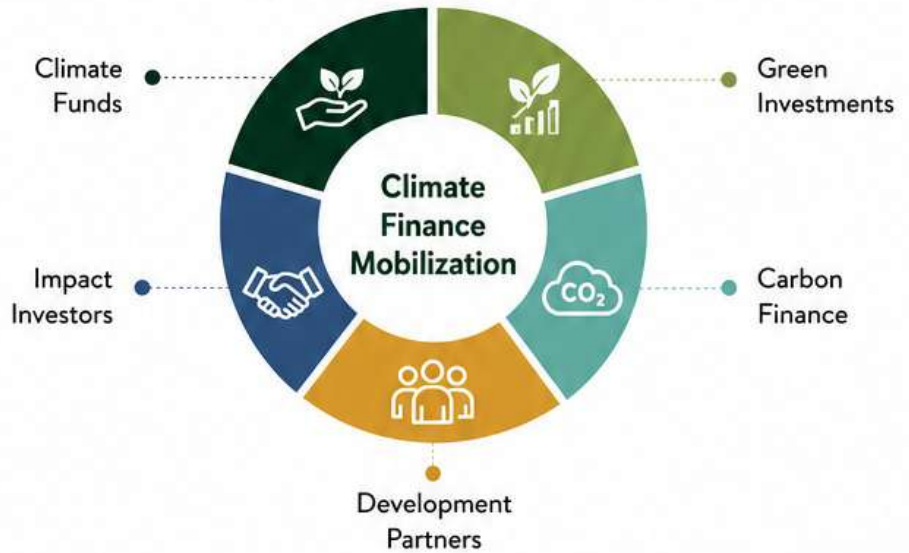

Risk management, stakeholder coordination and implementation support.

“

Sustainable environmental impact requires strong governance, effective resource management and measurable results.

— John Kiwewesi

CLIMATE FINANCE SUPPORT

PROJECTS SUPPORTED

AREA	EXAMPLES
Climate Change	Adaptation & Resilience
Forestry	Restoration & Conservation
Biodiversity	Ecosystem Protection
Agriculture	Climate Smart Agriculture
Energy	Renewable Energy Projects
Communities	Livelihood & Resilience Programs

BIODIVERSITY CONSERVATION & ECOSYSTEM RESTORATION

Protecting Natural Capital. Restoring Ecosystems. Building Resilience.

PROTECT

Safeguarding forests and natural habitats for future generations.

PRESERVE

Conserving biodiversity and sustaining vital ecosystems.

RESTORE

Restoring degraded landscapes and empowering communities.

AREAS OF FOCUS

BIODIVERSITY CONSERVATION

Protecting species, habitats and ecosystem integrity.

ECOSYSTEM RESTORATION

Restoring degraded forests, wetlands and landscapes.

NATURE-BASED SOLUTIONS

Using natural systems to address climate and development challenges.

PROTECTED AREA MANAGEMENT

Supporting conservation planning and sustainable management.

TYPICAL INTERVENTIONS

CONSERVATION	RESTORATION
Biodiversity Assessments	Forest Landscape Restoration
Species Protection	Wetland Restoration
Habitat Management	Watershed Rehabilitation
Conservation Planning	Community Restoration Programs

ECOSYSTEM BENEFITS

“

Healthy ecosystems are the foundation upon which resilient communities, sustainable economies and climate solutions are built.

— JOHN KIWEESI

08.

CLIMATE-SMART AGRICULTURE & LANDSCAPE RESILIENCE

Strengthening Food Security. Building Resilience.
Transforming Rural Livelihoods.

CLIMATE-SMART AGRICULTURE

- Sustainable farming systems
- Climate adaptation
- Crop diversification
- Resilient production systems

AGROFORESTRY

- Tree integration
- Farm restoration
- Soil protection
- Carbon sequestration

LANDSCAPE RESTORATION

- Watershed management
- Land rehabilitation
- Erosion control
- Ecosystem restoration

COMMUNITY RESILIENCE

- Livelihood improvement
- Farmer capacity building
- Community adaptation
- Sustainable income generation

LANDSCAPE RESILIENCE MODEL

KEY PROGRAM AREAS

FOCUS AREA	APPLICATION
 Climate-Smart Agriculture	Resilient farming systems
 Agroforestry	Tree-based production
 Watershed Management	Water conservation
 Land Restoration	Ecosystem recovery
 Community Resilience	Livelihood strengthening
 Natural Resource Management	Sustainable resource use

“

Resilient landscapes create resilient communities, sustainable livelihoods and long-term environmental security.

— John Kiwewesi

09.

CLIMATE CHANGE ADAPTATION & DISASTER RISK RESILIENCE

**Building Adaptive Communities.
Reducing Risk. Saving Lives.**

Help governments, communities and development partners strengthen resilience to climate impacts and disaster risks through evidence-based strategies and practical solutions.

CORE SERVICES

RISK ASSESSMENT

Identify and analyze climate hazards, vulnerabilities and exposure.

ADAPTATION PLANNING

Develop climate adaptation strategies and resilience action plans.

DISASTER RISK REDUCTION

Strengthen early warning systems, preparedness and risk reduction measures.

COMMUNITY RESILIENCE

Build local capacity and empower communities to adapt and thrive.

MONITORING & EVALUATION

Track progress, measure impact and improve resilience outcomes.

DELIVERING RESILIENCE IMPACT

SAFER COMMUNITIES

Reduced vulnerability and stronger preparedness.

ADAPTIVE LIVELIHOODS

Improved productivity and sustainable incomes.

CLIMATE RESILIENCE

Stronger systems to withstand climate shocks.

SUSTAINABLE FUTURE

Resilient ecosystems and thriving communities.

“ Resilience is not just about withstanding change — it’s about preparing today for a stronger, safer tomorrow. ”

— JOHN KIWEWESI

ENVIRONMENTAL POLICY, GOVERNANCE & NATURAL RESOURCE MANAGEMENT

Strengthening Institutions. Improving Governance. Delivering Sustainable Outcomes.

AREAS OF EXPERTISE

- 
ENVIRONMENTAL POLICY DEVELOPMENT
 Development of environmental frameworks, strategies and policy reviews.
- 
NATURAL RESOURCE GOVERNANCE
 Strengthening management systems for forests, land, water and biodiversity resources.
- 
INSTITUTIONAL STRENGTHENING
 Building capacity for environmental institutions and implementing agencies.
- 
ENVIRONMENTAL COMPLIANCE
 Supporting regulatory compliance and environmental performance improvement.
- 
STAKEHOLDER ENGAGEMENT
 Facilitating collaboration between governments, communities, private sector and development partners.

GOVERNANCE IMPACT DASHBOARD

“

Strong environmental governance transforms policies into measurable and lasting impact.

— John Kiwewesi
